PROFESSIONAL SUMMARY

AI and Full-Stack Developer with expertise in building enterprise-scale web applications and AI-powered systems. Proven track record of delivering RAG-based chatbots, automation pipelines, and cloud-integrated solutions that improve efficiency by 30-40%. Experienced in MERN stack, AWS infrastructure, and LLM applications. Currently pursuing M.Tech in AI for Sustainability at IIT Kanpur.

EDUCATION

Indian Institute of Technology Kanpur	Expected 2027
<i>M.Tech in AI for Sustainability</i>	2025–Present
Rajarambapu Institute of Technology, Maharashtra	2021–2025
<i>B.Tech in Computer Engineering</i> GPA: 9.70/10	

PROFESSIONAL EXPERIENCE

Software Development Intern | *Altair Engineering, Bangalore* Jan 2025–Jul 2025

- Developed MERN-based client portals for CEAT, MRF, and Mahindra enabling HPC simulation workflows with job scheduling, monitoring, and visualization dashboards
- Automated simulation pipelines using Python and REST APIs, reducing manual effort by 40%
- Implemented AWS integrations (S3, Athena, EC2) for secure data storage and compute handling
- Enhanced frontend performance by 30% through code-splitting, lazy loading, and API caching strategies

Web Developer | *Bubble Byte Ventures Pvt Ltd, Sangli* Sep 2022–Aug 2023

- Delivered responsive client websites with SEO optimization and reduced load times by 30% through asset optimization and caching
- Automated deployment operations using Python scripts, streamlining production workflows
- Collaborated with cross-functional teams to deliver production-ready user interfaces

KEY PROJECTS

RAG-Based Legal Chatbot | *Python, LangChain, FAISS, Llama2, Flask, React*

- Built end-to-end RAG pipeline with document retrieval and LLM integration for legal question-answering
- Implemented FAISS vector storage and chunking strategies for improved retrieval precision
- Published research paper in ICTCS 2024 Proceedings and presented at international conference

HPC Simulation Platform | *React, Node.js, Express, MongoDB, AWS*

- Developed secure role-based enterprise portals with automated job submission pipelines
- Integrated AWS services for scalable cloud infrastructure and real-time monitoring

AI Resume Analyzer | *Flask, MongoDB, React, Gemini API*

- Created resume scoring tool with ATS optimization, providing feedback and improvement suggestions
- Implemented full-stack architecture with RESTful APIs and responsive frontend

Minutes of Meeting Generator | *Google Speech-to-Text, GPT API*

- Developed audio-to-text pipeline generating structured meeting summaries with 70%+ effectiveness

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python, React.js, Next.js, Node.js, Express, Flask

AI/ML: LangChain, HuggingFace, Llama2, OpenAI, Gemini API, RAG Systems, NLP

Cloud & DevOps: AWS (S3, EC2, Athena), Google Cloud, Vercel

Databases: MongoDB, Prisma

Tools: Git, GitHub, Postman, Redux, REST APIs, Tailwind CSS, Framer Motion

LEADERSHIP & ACHIEVEMENTS

Community Lead | *Google Developer Groups (GDG) RIT* 2024–2025

- Led community of 45+ members, conducting 5+ technical workshops on React, GenAI, and career development
- Mentored 20+ students in development practices, increasing technical engagement by 40%

Certifications: Generative AI with Large Language Models (DeepLearning.AI, 2024)
